```

```
Two digit month[01,12]: 04
```

In [12]:
```
res=cd.strftime("%b")
print("\nShort version of month",res)
```

```
Short version of month Apr
```

In [14]:
```
res=cd.strftime("%B")
print("\nFull name of the month:",res)
```

```
Full name of the month: April
```

In [15]:
```
res=cd.strftime("%j")
print("\nDays of the year:",res)
```

```
Days of the year: 103
```

In [16]:
```
res=cd.strftime("%D")
print("\nShortcut for %m/%d/%y:",res)
```

```
Shortcut for %m/%d/%y: 04/13/26
```

In [17]:
```
res=cd.strftime("%d")
print("\nTwo digit day:",res)
```

```
Two digit day: 13
```

In [18]:
```
res=cd.strftime("%a")
print("\nShort version of the day",res)
```

```
Short version of the day Mon
```

In [20]:
```
res=cd.strftime("%A")
print("\nFull name of the day:",res)
```

```
Full name of the day: Monday
```

In [21]:
```
res=cd.strftime("%H")
print("\nHour (24 hour clock):",res)
```

```
Hour (24 hour clock): 21
```

In [24]:
```
res=cd.strftime("%I")
print("\nHour (12-hour clock)",res)
```

```
Hour (12-hour clock) 09
```

In [26]:
```
res=cd.strftime("%M")
print("\nTwo digit minuite:",res)
```

```
Two digit minuite: 05
```

In [27]:
```
res=cd.strftime("%S")
print("\nSecond:",res)
```

```
Second: 51
```

In [28]:
```
res=cd.strftime("%F")
print("\nShortcut for%Y-%m-%d:",res)
```

```
Shortcut for%Y-%m-%d: 2026-04-13
```

In [29]:
```
res=cd.strftime("%f")
print("\nMicrosecond as an integer:",res)
```

```
Microsecond as an integer: 014220
```

In [30]:

```
res=cd.strftime("%p")
print("\nLocal equivalent of AM or PM:",res)
```

```
Local equivalent of AM or PM: PM
```
